- Coal & Coke Traders
- Consultants /Analysts
- Shipbuilder & Logistic Consultants
- Construction & Infrastructure Industry
- Automobile Industry
- Manufacturers
- Vendors & Service Providers

Theme: Indian Steel Industry- Challenges & Prospects

Steel Scenario Journal is organizing now its traditional 17th **Annual International Steel Seminar & Exhibition**, jointly with Steel Times International, UK between **19-21 January 2010 at Kolkata**.

India, one of the few major steel producing regions, increased steel output last year despite recession. Currently the fifth largest steel producer in the world, India plans to be number two by 2020. But, with the present global meltdown, Indian Steel Industry needs to reflect upon the various Challenges and Prospects.

If you are planning to do business in the growing Indian market and to expand further your business in the international arena, you cannot afford to miss the opportunity to display your products and services to a large number of companies coming from all over Europe, China and US as Speakers, Delegates & Exhibitors.

The Growing Indian Market

India produced 55Mt crude steel in 2008, making it the 5th largest producer in the world. With expansion plans to reach 150Mt by 2020, India is set to become second to China in global production.
